🧠 Brainstorming & Ideation Prioritization

💡 Brainstorming

Problem:

IT procurement process is often slow and difficult to manage because requests, approvals, vendor details, and budgets are handled separately.

Brainstorming Ideas:

→ Centralized IT Procurement Portal

→ Automated Approval System

→ Vendor Comparison System

→ Budget Tracking

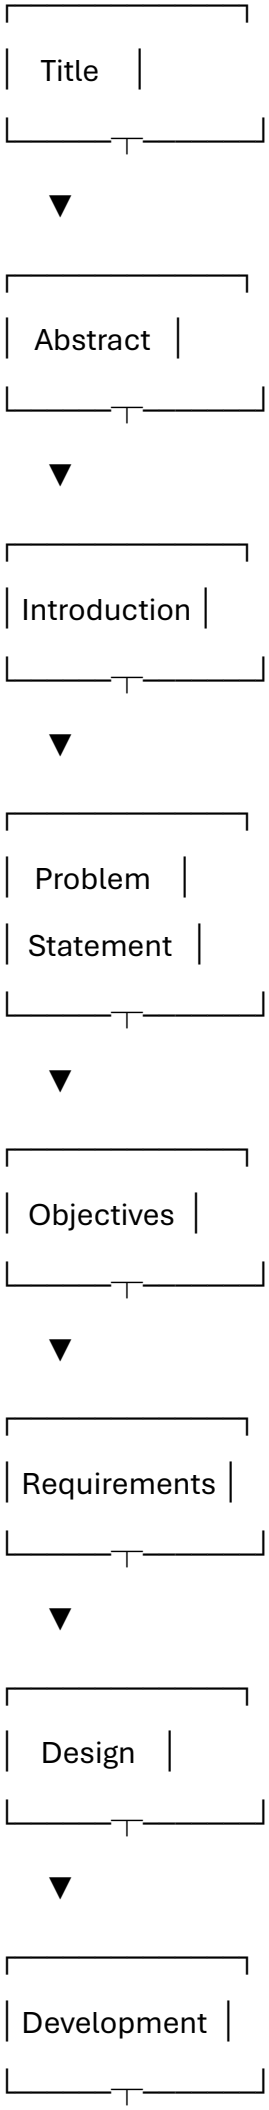

→ Purchase Request Tracking

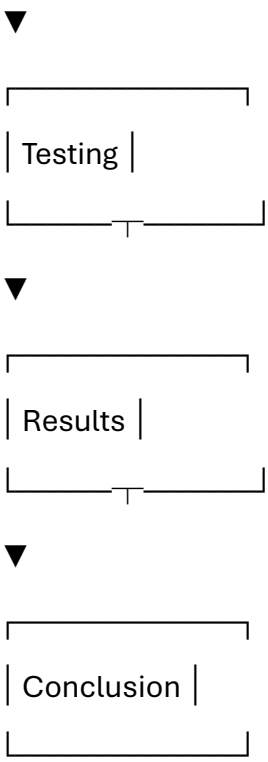

→ Vendor Database

→ Automated Notifications

→ Purchase History Management

🎯 Ideation Prioritization

⭐ Prioritized Ideas

1. Centralized Procurement Portal

All procurement activities can be managed in one platform.

2. Automated Approval System

Requests can be automatically sent to the concerned person for approval.

3. Vendor Comparison

Different vendors can be compared based on price, quality and delivery.

4. Budget Tracking

The system can monitor the available budget and spending.

5. Purchase Tracking

Users can easily track the status of their purchase requests.

✅ Final Selected Idea

“A centralized IT procurement system that simplifies purchase requests, approvals, vendor comparison, budget management and purchase tracking.”
